

Radiology

DRS. LISA FORREST, KEN WALLER, SAMANTHA LOEBER, JR LUND, DARREL YAP, SARA TOLLIVER

Core Radiology

- Offered throughout the year
- Rotation Emphasis
 - ▶ Technical
 - ▶ Image Interpretation
 - Introduction to Ultrasound
- Required for All
- ▶ Best time to take
 - ► Early for Intern Candidates & before externships
- ► Clinic Schedule M-F, 8:00 to 5:30
- Outpatients & Inpatients

Core Radiology

- What to Expect
 - Patient positioning for imaging studies
 - Perform Radiography
 - ► Critique technique
 - ► Image interpretation
 - Make presentations
 - ▶ Receiving: M F, all day
 - Service Specific Clinical Work Expectations:
 - Facilitate radiography and ultrasound throughput
 - ▶ Necropsy presentations

- What to Expect (continued)
 - ► On Call Schedule ICU/Sx
 - Evenings & Weekends
 - Study Expectations
 - Thrall Textbook Required
 - ► Preparation for Rounds
 - Radiology/Pathology Presentation
 - Quizzes

Radiology – Directed Study

- ▶ Rotation Emphasis: Student dependent
- ▶ When: After core rotation
- Recommend: contact radiology faculty member
 - ▶ Your goals
 - Specific project
 - More experience evaluating images
 - ► Go through list of interesting cases
 - Write your report & then compare with finalized report
 - ▶ Use Thrall and other textbooks

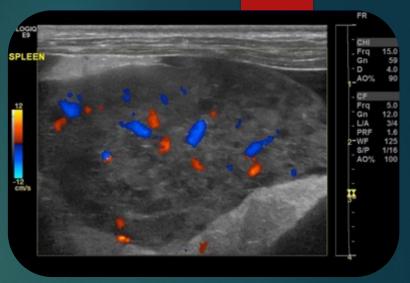

Radiology – Directed Study (cont.)

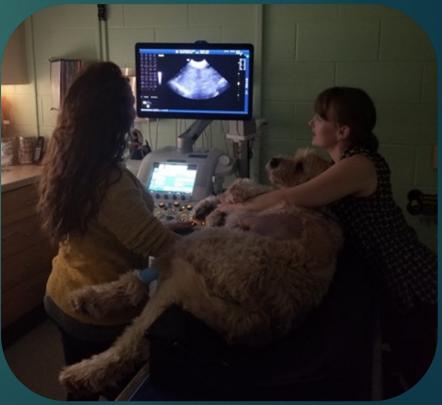

- What you should expect, dependent on choice:
 - ▶ Identify project with faculty member
 - ▶ Organize and plan prior to DS
 - ▶ More imaging experience
 - Independent image evaluation and reading

Ultrasound Elective

- Offered year-round
- Rotation emphasis:
 - ► Hands-on experience
 - ▶ Technical parameters
 - Image interpretation
- Recommended for: Small Animal & Mixed
 - Students interested in additional hands-on US experience
- Best time to take:
 - ► Early for intern candidates & before externships
 - Near graduation to refine skills (can take multiple times)
- ► Clinic schedule: 1 week, M-F 8:30am-5:30pm
- Outpatient & Inpatient
- Weekend duty: None assigned

Ultrasound Elective

- What should you expect to do:
 - Evaluate US exams on SA patients
 - Perform US exams on non-critical patients
 - Discuss US cases with radiologists
 - ► Complete Ultrasound Assignment Presentation
- Organization of receiving:
 - Dependent on US requests submitted from SA services
- Service Specific Clinic Work expectations:
 - Facilitate completion of clinical US patient load
 - Actively participate in US examinations

- On-Call Schedule/ICU:
 - None
- Study Expectations:
 - Become familiar with basic US physics and common US artifacts
 - Recognize normal anatomy and disease on US
 - Review US cases and study material relevant to cases
 - Preparation for rounds
 - Complete US test
